New technology. New questions.

RCA P61300 HDTV

New solutions.

Your Guide to the Digital Age of Home Entertainment.

RCA

Changing Entertainment. Again.

Downloaded from www.Manualslib.com manuals search engine

The RCA Catalog is a solutions guide to all of your home electronics needs.

Welcome to the RCA Home Electronics Catalog. Our experts have set out to find out what you want in home entertainment. They have listened to your likes and dislikes and created products centered around the way you use home entertainment. You can count on RCA products to deliver incredible pictures and sound with highly advanced features, that are easy to use.

And our experts know that the electronics vocabulary can be complex. There is Digital TV, HDTV, DVD, Divx[1], Dolby Digital[2], Dolby[3] Pro-Logic...the list goes on and on. Which is which? What does what? We'll explain the differences because our experts believe, the more you know about home electronics, the more likely you will come to insist on the RCA brand.

Downloaded from www.Manualslib.com manuals search engine

The RCA line of home electronics gives you superior performance with easy-to-use convenience.

HDTV/ Digital Products **Pages 4-13**

HDTV ushers in a new age in television with theatre-like dimensions, vivid picture and Dolby Digital[2] sound. With over 1 million pixels of resolution that is unlike anything seen before.

Televisions **Pages 14-29**

RCA televisions offer great picture and sound and are packed with convenience features such as GUIDE Plus+[4], that make finding and recording your favorite programs easier than ever.

TV/VCRs **Pages 30-33**

A TV/VCR combo offers many features in a convenient package. There are sizes and colors that can fit in any room of your home.

Satellite Systems **Pages 34-37**

RCA Satellite Systems featuring DIRECTV® programming give you more sports, more movies, more options. Plus, DIRECTV® is your entry to the world of HDTV programming.

DVD Players **Pages 38-40**

RCA DVD players deliver great digital picture and sound. With DVD you get the best picture possible for the life of the disc.

Digital Cable Modems **Page 41**

Experience immediate internet access—with incredible speed—right through your cable system!*

VCRs **Pages 42-45**

With features like Commercial Advance[5] and Movie Advance[5], this year's line of VCRs combines convenience with quality picture and sound.

Camcorders **Pages 46-49**

Capturing life's precious moments is made simple with the RCA AutoShot™ feature. Just point the camera and shoot.

Audio Products **Pages 50-65**

RCA Audio products give you theatre-quality sound right in your own home. And, with a wide assortment of audio products you can have great sounds wherever you go.

Accessories **Pages 66-71**

Enhance and protect your purchases with our full-line of quality accessories. From surge protectors to camera lenses, we have accessories for all your needs.

*Monthly subscription fee applies.

Nothing compares to the excitement of the silver screen.

Until now.

digital HDTV

Not since RCA introduced color television in 1954 has the world of home entertainment undergone such a major change. The new digital broadcast signals will give you an amazingly lifelike picture and Dolby[1] Digital sound. HDTV offers over 1 million pixels of resolution that is unlike anything seen before. The 16:9 screen ratio allows you to watch movies the way they were meant to be seen without letter-boxing. Sports look and sound so real, you would swear that you were in the stadium. Home entertainment will never be the same and an RCA HDTV is the best way to enjoy the new age in television.

HDTV ushers in a new age in television with theater-like dimensions, vivid picture and Dolby Digital[1] surround sound.

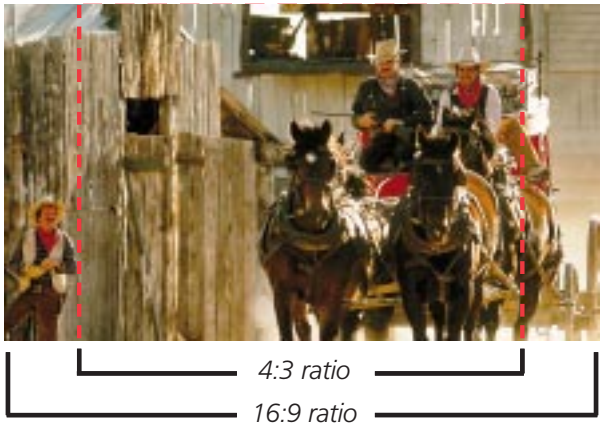
digital HDTV

RCA High-Definition is the new definition for television.

For nearly 60 years, analog television has been the broadcast standard. This standard is now being replaced by digital television, which uses a continuous stream of numbers to transmit picture, sound, and information. This new method produces amazing results. The RCA HDTV delivers its brilliantly clear picture on a rectangular 16:9 ratio screen. It also features the incomparable Dolby[1] Digital audio system that makes the sound as lifelike as the picture. This combination delivers an entertainment experience that is unmatchable.

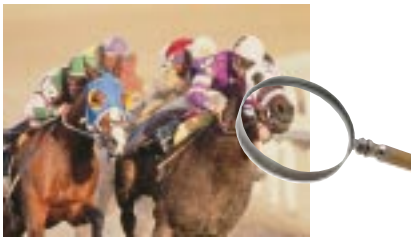
Movies will look like movies!

Most televisions have a 4:3 aspect ratio, but movie aspect ratios are closer to 16:9. With RCA HDTV, you'll see more — the whole picture, complete — of every program broadcast in the widescreen format.



What is the HDTV picture difference?

The digital information of HDTV is translated into pixels. The higher the pixel number, the better the picture. HDTV can receive up to ten times as many pixels as today's TV—that's 2,000,0000 pixels compared to 200,000 you get with normal analog technology. That gives you the sharpest, clearest picture ever available with virtually no lines. The first time you see the picture on RCA HDTV, you might not believe your eyes.



Standard NTSC broadcast

200,000+ pixels

HDTV

Simulated pictures.

1920 X 1080 Lines = 2,073,600 pixels

The first time you see HDTV, you might not believe your eyes!

digital HDTV

We could compare it to a movie screen, but it's actually better. Better because RCA HDTV's innovative technology puts you in the heart of the action. In fact, it's the closest thing to being there. Speaking of better, the RCA HDTV is not only the most technologically advanced television we have ever made, it is also easy to operate. We have incorporated a navigational system that operates with the touch of a button on the remote control. We have also included a tuner that automatically deciphers the incoming video and audio information and translates it into the lifelike pictures and sounds of your favorite programs. With these convenient features of an RCA HDTV, you don't have to be a technological wonder to enjoy the wonders of technology.

Pixel Comparison

Today's broadcast signal lights up about 200,000 pixels arranged in a 4:3 rectangle. High-definition digital television is different. At the very minimum, over-the-air digital television offers a picture that's 640 pixels wide by 480 pixels high—that's over 300,000 pixels (about 50% more than today's TV).

Since we know that more pixels means more visual information, we're talking about a sharper picture. In the past, a sharper picture was just...sharper. But with digital television, there's a way to quantify just how sharp it is.

From the minimum of 300,000 pixels all the way up to about a million pixels is called standard definition digital television, or SDTV.

High-definition digital television, or HDTV, starts at around a million pixels and can go all the way up to 2 million—almost 10 times the resolution of today's TV.

Downloaded from www.Manualslib.com manuals search engine

When will I be able to see HDTV?

With DIRECTV®, you will have HDTV programming options wherever you live. Over-the-air broadcasts of digital television begin in the top ten U.S. television markets in late 1998, expanding to the top 30 markets gradually by the turn of the century. All over-the-air stations must be broadcasting digital signals by 2003. Current analog signals will be available at least until 2006.

First Ten Digital TV Markets by May, 1999

- Atlanta
- Boston
- Chicago
- Dallas/Ft. Worth
- Detroit
- New York
- Philadelphia
- Los Angeles
- San Francisco
- Washington, D.C.

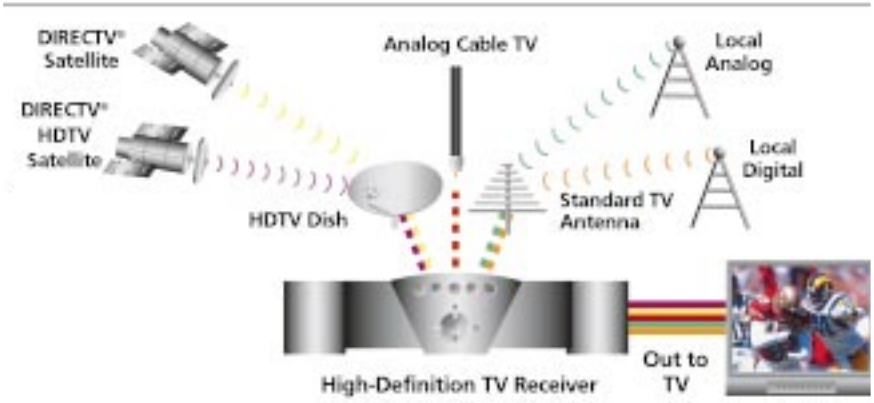
The exciting new world of HDTV provides new programming options with digital picture and sound. Even though the best way to enjoy this new programming is on an RCA HDTV, the RCA High-Definition Digital Receiver is a perfect way to transition into this new entertainment with your current television. You will be able to receive all current analog programming, local HDTV transmissions, analog cable, and satellite programming from DIRECTV®. With DIRECTV®, you have access to HDTV programming as it becomes available, even if the major stations in your area are not broadcasting in this format. Even on an analog television, HDTV can provide DVD quality picture[3] and Dolby[1] Digital sound.

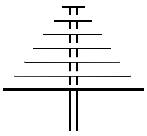
With the RCA Brand High Definition Digital Receiver you can enjoy HDTV programming on your current analog television.

Downloaded from www.Manualslib.com manuals search engine

This RCA HD|Digital Receiver is capable of receiving most broadcast and DIRECTV® satellite signals currently available.

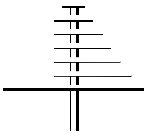
The RCA HD|Digital Receiver (DTC100) is capable of processing the highest resolution format HDTV signal. This receiver gives you the ability to receive a wide array of programming options including current local broadcasts and high-definition (HD) broadcasts where available. In addition, the DTC100 will receive and decode standard digital and high-definition DIRECTV® programming.





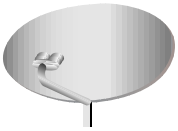
Local Analog

Receive all local standard analog broadcasts with your current indoor or outdoor antenna.



Local Digital

Receive local digital broadcasts using your current indoor or outdoor antenna.



DIRECTV® Satellite

Receives DIRECTV® programming using a satellite dish antenna (sold separately). With a subscription to DIRECTV®, you will have access to hundreds of channels including HD and digital programming.

Analog Cable

The DTC100 is also cable ready—it will accept the coaxial cable from your local service provider.

The RCA HD|Digital Receiver lets you make the transition to the future of television—TODAY!

- Allows you to use your current television as well as full high-definition displays.
- The HD|Digital Receiver provides easy-to-use on screen menu systems for easy navigation.
- Dolby[1] Digital Capability
- On-Screen Program Guides, both 5 and 7 lines.
- Interactive Channel Banner
- Format Control (4:3 and 16:9)

Compatible with a wide variety of TVs and Display Monitors:

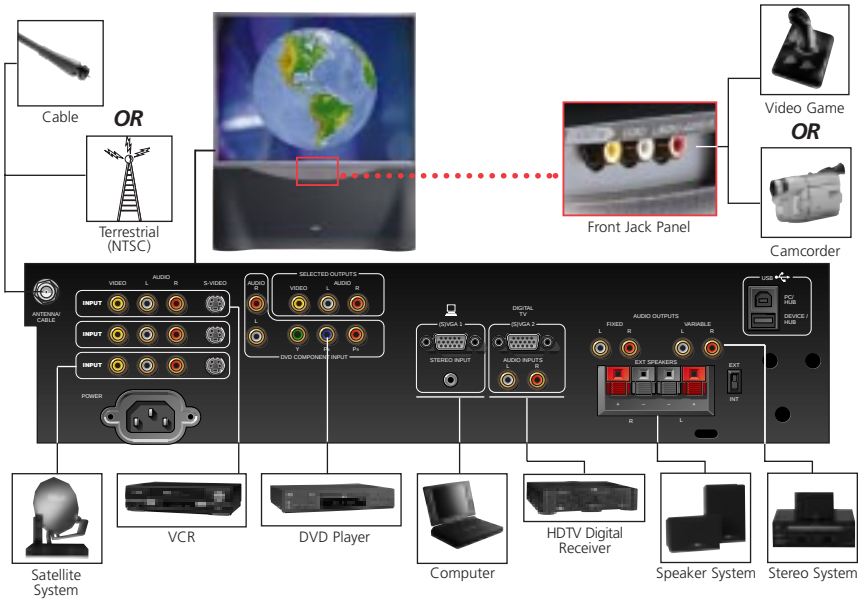
Digital High-Resolution Monitors

Connect your world—for today and tomorrow.

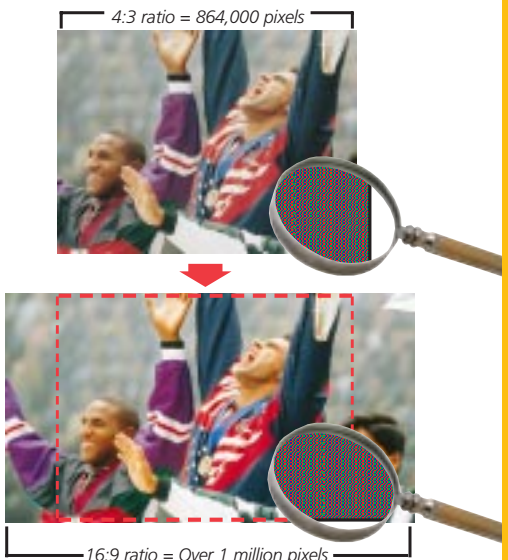
The RCA brand has always offered innovative technologies to enhance your home entertainment experience, and now the RCA Digital High-Resolution Monitor lives up to this commitment by offering outstanding picture performance and multiple connectivity options. This is the perfect vehicle to help you make the transition into the world of HDTV. In addition, with its 40 audio and video inputs, the RCA High-Resolution Monitor has much more to offer outside the world of HDTV. It's the perfect display for your computer, VCR, standard TV broadcasts, video games and your DVD player—and they can all be connected at the same time!



Enjoy the clarity of an HDTV-quality picture.

Combining the Digital High-Resolution Monitor with a DTC100 High-Definition Digital Receiver will provide you an HDTV-quality picture.

Within the monitor's 4:3 aspect ratio viewing area, you receive the same pixel resolution inch for inch as with an HDTV picture. It is the 30% wider 16:9 aspect ratio screen that defines HDTV resolution.



Simulated pictures.

Picture Features

Dark-Tint Screen—25% Improved Brightness (on Projection Models)

New screen design improves brightness by 25% while utilizing dark-tint double lenticular and fresnel levels to enhance picture contrast with blacker blacks, brilliant whites, and deep rich color.

High Performance Video Amplifier

Delivers high resolution and clarity by extending the video frequency response. Optimizes performance from high-resolution sources such as the RCA Satellite System, DVD players, and S-Video signals (S-VHS, Hi8).

3-Line Digital Comb Filter

Separates black-and-white detail from color information to virtually eliminate edge crawls and rainbow effects while extending picture resolution.

Sound Features

Broadcast Stereo with dbx[3] Noise Reduction

Improves the clarity and fidelity of stereo broadcasts by restoring dynamic range and suppressing unwanted noise.

SRS Sound Retrieval System[4]

Brings dimensional realism to television audio without the need for additional speakers. Restores the information used to determine distance and direction turning normal audio into a three-dimensional sensation.

Pixel Comparison

From the minimum of 300,000 pixels all the way up to about a million pixels is called standard definition digital television, or SDTV.

High-definition digital television, or HDTV, starts at around a million pixels and can go all the way up to 2 million—almost 10 times the resolution of today's TV.

GUIDEplus+ GOLD[1]
GEMSTAR

How to find the show you want.

The Grid Guide

Using the directional arrow pads on your remote, you may scroll through up-to-the-minute TV listings, or scroll to future programs. As each channel grid is highlighted, the current program appears in the preview window, and a description is shown in the information area to the right of the window. Or if you can't tear yourself away from the game, you can continue to watch your programming in the preview window while you scan through the program grids.

May we suggest something for you to watch?

The Sort Guide

Want to relax and watch a movie? SORT lists movies by theme that are on for the next seven days. SORT can also help you find your favorite game or sports or children's programs.

Updated news at the press of a button.

News

Review top national and world news stories, updated daily, and accessed through the NEWS menu item on the Guide bar. Comprehensive coverage includes news, weather, sports and entertainment stories.

Program and record with one touch.

Even if your VCR is flashing 12:00, GUIDE Plus+ GOLD[1] can record your favorite show. Simply highlight the program you would like to record and press the Record button on the remote. You can choose to record shows once, daily, or weekly.

Simulated picture.

Finding your program is now easy. Watching it is amazing with excellent picture and sound.

Picture Features

3-Line Digital Comb Filter

New digital separation technology dramatically enhances picture resolution by eliminating blurred edges between colors and reducing dot crawl, producing a new level of picture sharpness and detail.

Digital Focus

Computer-aligned 10-bit circuitry provides precise and consistent picture performance from the moment the TV is turned on. When combined with Dynamic Focus, it maximizes picture brightness with sharper corner focus, ensuring a beautifully detailed picture across the entire screen.

Dark-Tint, High-Contrast Picture Tube (on Direct-View Models)

Dark glass picture tube delivers outstanding picture contrast for blacker blacks, brilliant whites, and deep, rich colors even in bright room conditions.

High Performance Scan Velocity Modulation (SVM)

Improved SVM circuitry automatically varies the scanning speed of the picture tube's electron beam to improve sharpness and detail, especially in high-contrast areas.

Custom Convergence

When the earth's magnetic field interferes with the Projection TV alignment, adjustable convergence provides fine tuning for red, blue and green Projection TV tubes. The 8-bit DA converter allows precise alignment, restoring picture quality to its original setting.

Sound Features

SRS Sound Retrieval System[2]

Delivers three-dimensional realism from the television's built-in speakers by restoring the spatial information your ears use to determine distance and direction. There are no additional speakers, wires or equipment required.

Sound Logic™ Audio Leveler

The leveler automatically reduces the annoying "blast" in volume during commercial breaks, and also amplifies softer sounds in program material. This feature eliminates the need to constantly adjust the volume control.

RCA TV/VCRs offer quality features in a size that can fit in any scheme. Front and Rear Audio/Video inputs provide convenient connection for a video game, camcorder, or even another VCR. The Advanced Auto Channel Search sets the tuner to cable or locks active channels into memory. Combined with Auto Tracking and a Trilingual On-Screen Display, the TV/VCR combo gives you great performance anywhere you need it—from the college dorm room to the household kitchen. The combos even come equipped with a sleep and alarm timer.

When space is scarce, a TV/VCR combo is the perfect solution.

Simulated picture.

Downloaded from www.Manualslib.com manuals search engine

RCA TV/VCRs let you watch your favorite shows and tapes wherever you are.

Delivering entertainment wherever you want it is the focus of RCA TV/VCR combos. These combos pack quality sound and picture and helpful features into a size that fits anywhere. Whether for the kitchen or on the road, there is a TV/VCR combo just for you!

Kitchen TV/VCR

KITCHEN

The white exterior of this TV/VCR combo blends right in with your kitchen. It comes with the *Easy Clean* remote, giving you worry-free control and convenience.

Bedroom TV/VCR

BEDROOM

Relax into the evening or spend a lazy morning in bed with our Bedroom TV/VCR. The NITEglo™ remote lets you control the TV/VCR without having to turn on the lights.

Mobile TV/VCR

MOBILE

Perfect for those long family road trips. Just plug in the AC adapter and the kids can watch their favorite movies while you travel.

Easy Clean Remote

Designed for any area where messes can easily happen, the *Easy Clean* remote is protected by a clear plastic cover that wipes clean easily. It also has a convenient handle for hanging it on the wall.

Front Audio/Video Inputs

Simulated picture.

RCA TV/VCRs provide convenient connection on front panel for camcorder or video game.

RCA TV/VCRs give you convenient features in a convenient package.

Convenience Features

Advanced Auto Channel Search

The Auto Cable/Air Switch sets tuner to cable or "off-air" frequencies during initial setup. The system automatically scans for and locks active channels into channel memory.

Auto Tracking

This feature lets you play most VHS tapes without the need for manual tracking adjustments

Trilingual On-Screen Display

Choose the on-screen menu system to be displayed in English, French or Spanish.

30-Second Commercial Skip

Commercial Skip allows you to browse other channels during commercial breaks and then automatically returns to your original channel when the break is over so you don't miss any of your show.

Headphone Jack

Listen privately to the TV with optional headphones or earphones.

One-Button Express Record (XPR)

Simplifies the recording of a TV show in progress. One button begins recording and sets the program length so that the VCR records and switches off automatically.

The RCA Satellite System opens up a whole world of DIRECTV® programming options, and more. Sign up for sports subscriptions, such as NFL Sunday Ticket™, and you'll never miss the game you want to watch. There is something for everyone with a wide selection of basic channels, premium movie channels, pay-per-view, Audio Music Choice, and high-definition programming (as it becomes available). And the RCA Satellite System is loaded with features like SurfGuide™, Scout™, and Alpha Sort™ that make navigating the program choices a breeze.

DIRECTV is a trademark of DIRECTV, Inc., a unit of Hughes Electronics Corp. and is used with permission.

The RCA Satellite System featuring DIRECTV® offers you more sports, more movies, more options.

(not available in Canada)

Downloaded from www.Manualslib.com manuals search engine

Advanced On-Screen Program Guides give you several ways to find your programs.

SurfGuide™

The SurfGuide brings up seven channels of programs at a time. Surf up and down the guide, viewing the current 30-minute or up to a two-hour time window of programming. You'll never miss out on any of the action of your current show, because it stays active in the background while you explore other channels.

Information Guide

Lists five different channels of programming at a glance. Details on the current highlighted program are displayed in a banner at the top of the screen. Program information changes automatically as you navigate through the guide and highlights different programs.

Full Seven-Line Program Guide

Provides channel and program title information for seven different channels covering a two-hour time window. Arrows help indicate programs starting before or ending after the current time shown on the grid.

The Interactive Channel Banner makes access to features quick and easy.

The translucent, see-through Interactive Channel Banner makes access to the key features of the RCA Satellite System fast and easy. We've taken the most exciting new features, created icons for each of them, and positioned them in the banner for direct access.

Interactive Channel Banner

Scout™

The new Scout feature searches the entire program guide to find matches to eight key words or phrases that you enter.

Scout

Alpha Sort™

AlphaSort allows you to sort the current guide alphabetically, starting with any letter you choose. Go directly to any listed show with the push of one button.

The Guardian™

With this feature, parents have the ability to lock out specific channels and set rating and spending limits.

Alpha Sort

Faster performance, better sound and more control are just some of the RCA Satellite System's benefits.

Sound Features

DOLBY DIGITAL

Dolby Digital[1] Sound Capability

Dolby Digital[1] (when available) provides six independent soundtrack channels through the optical output jack. When connected to an optional, compatible six-channel amplifier/receiver and speakers, this connection provides Dolby Digital[1] Surround Sound (on DS4280RE).

Convenience Features

Accelerated 32-Bit Processor

A 32-bit processor is at the heart of this new system. The accelerated performance allows immediate access to all the new interactive features.

Master Touch® Universal Remote

This UHF universal remote will control your satellite receiver from any room in the house. Navigation buttons are ergonomically designed and located to make surfing the program guides fun. Use the remote with the new built-in UHF capability from any room. (Available on select models.)

One-Button Record

Records any program being viewed or highlighted on the main program guides with the touch of one button. The receiver sends infrared commands to the VCR to execute the recordings at the proper time. (Featured on all Dual LNB systems.)

Downloaded from www.Manualslib.com manuals search engine

DIRECTV® System Programming

DIRECTV® System delivers standard digital programming signals with amazing digital-quality picture and sound. DIRECTV® System currently provides access to over 200 channels of standard digital entertainment choices*. That means more movies, sports, music, news and information than you'll find on cable or any other digital TV service—including all the popular TV and music networks, your favorite premium movie channels, 31 commercial-free Music Choice audio channels, up to 55 pay-per-view choices a night, optional pro and college sports subscriptions and much, much more!

For more programming information, call 1-800 DIRECTV (347-3288)

Programming sold separately. All programming subject to change.

DIRECTV is a trademark of DIRECTV, Inc., a unit of Hughes Electronics Corp. and is used with permission.

All other trademarks and service marks are the property of their respective owners.

A world of programming options.

With RCA DVD players you can enjoy great digital quality pictures and amazing Dolby Digital[1] sound, right in your own home. A DVD disc doesn't deteriorate with normal use and care, so you can enjoy your favorite movies with the same quality performance each and every time. DVD gives you many more features such as language options, scene advance, extra footage, and scene navigation. Plus, with the Divx feature, you have new options for renting and owning movies. An RCA DVD Player featuring Divx will play both DVD and Divx formats as well as music CDs, adding convenience to an already enhanced home theatre experience.

The RCA DVD Player featuring Divx[2].

Enjoy your favorite movies again and again with amazing picture quality and sound.

Downloaded from www.Manualslib.com manuals search engine

The best way to watch movies at home!

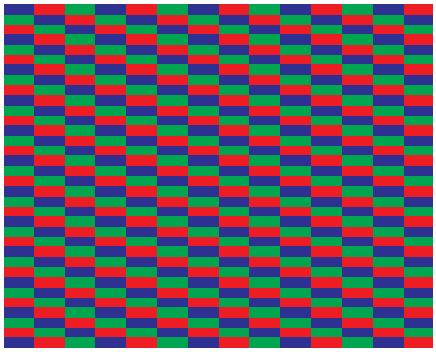
The RCA brand leadership in technology continues on the cutting edge of home entertainment with a new dimension from DVD—Divx! Divx offers optional convenience of a video rental store, right in your own home. That means no returns, no late fees, and the flexibility of watching a movie whenever you want. And, you can build a video collection of the most current movies with the digital-quality audio and video of DVD! Divx allows for a 48-hour viewing period once the movie is first played. Options for additional viewing periods or purchase of unlimited viewing are available at any time via registration and connection to a telephone line. Enjoy the complete digital revolution with DVD and Divx!

You get these quality features with every RCA DVD player.

Unsurpassed Picture Quality[3]

DVD delivers pictures with over twice the definition of standard VHS. The high-density technology on the 5" DVD disc stores over two times the number of pixels versus standard VHS.

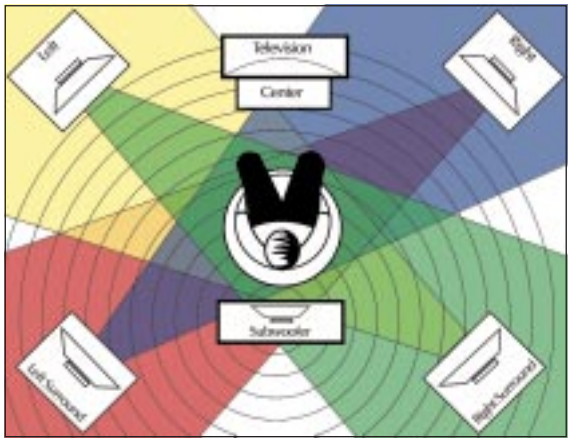
RCA DVD Picture
720 pixels per horizontal line
(480 active lines of vertical resolution)



Standard VHS Picture
320 pixels per horizontal line
(480 active lines of vertical resolution)

State-of-the-Art Audio

Dolby Digital[1] and DTS[4] provide three different audio channels from the front of the screen, two unique rear surround sound channels, and a separate subwoofer sound track. Dolby Digital[1] allows you to experience true movie theatre sound right in your own home.

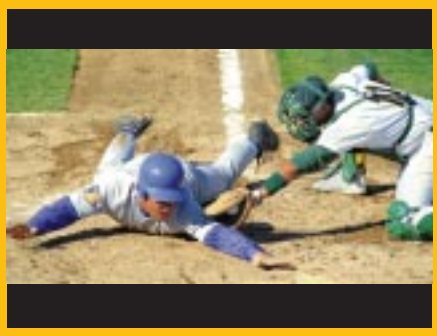


DVD gives you more options for picture and sound.

Picture Features

Multiple Aspect Ratios

With the press of a button, the DVD player can switch between aspect ratios: A 4:3 ratio (like a normal television picture); a 4:3 letterbox[5] (theatre-style screen) and a 16:9[6] (HDTV format).



4:3 Letterbox Format
Theatre-Style Screen

4:3 Aspect Ratio
Standard Television Screen

Sound Features

Plays Music CDs

The RCA DVD player is totally compatible with your current music CD collection and offers audio playback features similar to most CD players.

Digital Cable Modem

With the RCA brand, the information superhighway just got a lot faster.

DCM105

The RCA DCM105 is a digital cable modem that provides two-way high-speed Internet access to your personal computer. It's designed for use in home, small office and educational settings and operates through existing cable TV networks. With the DCM105, subscribers will be able to access interactive multimedia services on the Internet and send and receive information at speeds up to 100 times faster than a 28.8 Kbps telephone modem.

Fast!

The RCA DCM offers one of the fastest, most efficient ways to get on-line and surf the net. You'll have instant access to high-speed internet browsing, e-mail, chat, and news services at speeds up to 100 times faster than your dial-up telephone modem[1].

Convenient!

No boot-up. No dial-in. No busy signal. The cable modem is always "on"—ready when you are. You'll have unlimited access, 24 hours a day, 7 days a week. And the RCA DCM hooks right up to your current cable system, so there's no need to add costly phone lines or adapters.

You'll never tie up your home phone line again!
Consult your cable provider for availability and subscription fee information.

Fast, Two-Way Communication

The RCA DCM105 offers two-way high-speed access to interactive video, data, and audio applications through broadband cable services. It provides access to data channels that carry information at rates up to 38 megabits per second downstream and 10 megabits per second upstream. You'll be able to send and receive information at speeds up to 100 times faster than a dial-up modem[1] and up to 15 times faster than a conventional ISDN line—that's as fast as a T1 line.

CableLabs Certified
(DOCSIS Compliant)

"Data Over Cable Service Interface Specification" (DOCSIS) is an industry standard that virtually all cable companies are adopting as they upgrade their systems. Being CableLabs Certified means the RCA DCM105 will work with virtually all DOCSIS upgraded cable systems in North America.

Advanced Features

Dynamic Frequency Agility, SNMP Management, fully configurable via the network, Automatic Level adjustment with MAC and Protocol filtering options.

Security

The RCA DCM supports Baseline Privacy to help provide safe information and data exchange.

PC System Requirements

CPU	Pentium (equivalent or better)
System RAM	16MB (32MB preferred)

COMMERCIAL ▸▸ ADVANCE[1]
Eliminates Most Commercials During Playback[3]
MOVIE ▸▸ ADVANCE[1]
Locates the Beginning of Prerecorded Movies

RCA VCRs feature Commercial Advance[1] and Movie Advance[1]. Commercial Advance automatically fast forwards through most commercials, allowing you to watch your recorded programs in much less time. Movie advance finds the beginning of a rented or purchased videotape. You can even selectively skip through the previews, watching only the ones that you want. The VCR Plus+® feature makes programming your VCR simple. Great picture and sound and effortless operation define this year's line of VCRs.

With Commercial Advance[1], the RCA line of VCRs automatically fast forwards through most commercials.

VCR Plus+ is a trademark of Gemstar Development Corp.

Downloaded from www.Manualslib.com manuals search engine

COMMERCIAL ▸▸ ADVANCE[1]

Eliminates Most Commercials During Playback[3]

Give yourself a commercial break with Commercial Advance.

Eliminates having to watch most commercials of a recorded program during tape playback. User records and plays tapes no differently than before. After the recording, the Commercial Advance system locates and electronically marks most of the commercial segments. When a Commercial Advance tape is played back, the VCR automatically scans or fast forwards through the marked segments, displaying a blue screen (or video) during the process. With Commercial Advance, three minutes of commercial time is reduced to approximately 10 seconds (SLP mode), allowing you to conveniently watch your recorded shows in much less time.

Commercial Advance marks the tape at commercial segments so it knows when to fast-forward.

3 minutes of commercial time will fast forward in about 10 seconds (SLP Mode).

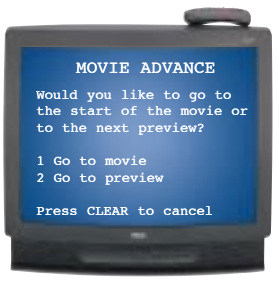
MOVIE ▸▸ ADVANCE[1]

Locates the Beginning of Prerecorded Movies

Let the VCR find the movie while you get the popcorn!

Automatically finds the beginning of the movie on most rented and purchased video tapes. You can also selectively watch the previews, skipping one to the next. With Movie Advance you can let the VCR find the movie while you take care of other things — like making the popcorn! Once the movie is found, the VCR cues to the beginning, pauses the tape and informs you that the movie is ready to play.

1 ***Insert VCR tape.***



MOVIE ADVANCE
Would you like to go to the start of the movie or to the next preview?
1 Go to movie
2 Go to preview
Press CLEAR to cancel

2 ***Follow instructions.***
VCR will prompt you on screen. Use your remote to answer questions.

3 ***The VCR waits for you.***
Simply press PLAY when you're ready to watch!

Simulated pictures.

Do you expect too much from a VCR? The RCA brand doesn't think so.

Picture Features

AccuSearch™
4-Head Video System

The double-azimuth video system produces superior, jitter-free special effects for a clear and stable picture during still/pause, slow motion and forward/reverse search.

Digital Auto Tracking

Allows playing of most VHS tapes without the need for manual tracking adjustments.

Sound Features

VHS Hi-Fi Stereo Recording/Playback

Incredible stereo audio reproduction. Two high-speed rotating audio heads helically scan the video tape to create stereo sound with dramatically-improved dynamic range, frequency response and signal-to-noise ratio.

Convenience Features

VCR Plus+[2] Programming with End-Time Adjustment

The VCR Plus+[2] System simplifies VCR programming by reducing programming entries. Program[4] the VCR by entering PlusCode[2] programming numbers which can be found in most newspapers and TV listing magazines, such as *TV Guide*[5]. Adjust the end-time, so if the program runs long, you won't miss a minute.

Auto Clock Set[6]

The Auto Clock Set circuitry reads the XDS broadcast signal[6] containing time of day and date information, automatically setting the clock during initial setup as well as after most power interruptions.

Deluxe Backlit Master Touch® Universal Remote CRK76VCL

New ergonomic design and color-coded buttons provide complete operation plus control of the primary functions of virtually every brand of remote-controllable TV, VCR, RCA Satellite System, and cable box. Frequently-used buttons on the backlit remotes illuminate for easier nighttime use.

You've been waiting for her first goal since the day she learned to skate. In three seconds, it will be history. Talk about a quick shot.

The full line of 1999 RCA Camcorders is equipped with AutoShot™, which automatically focuses and adjusts to the available lighting. Plus, our larger LCD displays and ColorView™ viewfinders allow you to enjoy the moment on-screen as it is happening. And after the moment is gone, use Quick Review to check the last recorded scene without losing the tape position.

Capturing those instant moments is made simple with AutoShot™. Just point the camcorder and shoot.

New Slim Design

Simulated picture.

Downloaded from www.Manualslib.com manuals search engine

AutoShot™

RCA AutoShot™ camcorders were specifically designed with ease of use in mind.

Let these RCA AutoShot™ features take the guesswork out of your video recordings.

Auto Focus

Provides fast and accurate automatic focusing from super-close-up to distant shots.

Auto Shutter Speed

Automatically selects the optimum shutter speed for the lighting condition.

Auto White Balance

Automatically adjusts for various lighting conditions to provide natural color representation.

Auto Iris

Allows the camcorder to automatically adjust the amount of light that is let in through the lens to compensate for extremes in lighting conditions.

With AutoShot™
Subject appears crisp and with good color representation.

Without AutoShot™
Entire shot can appear blurry, washed-out and have unnatural color representation.

Keep your eyes on the ball, not the eyepiece.

3" LCD ColorView™ Screen

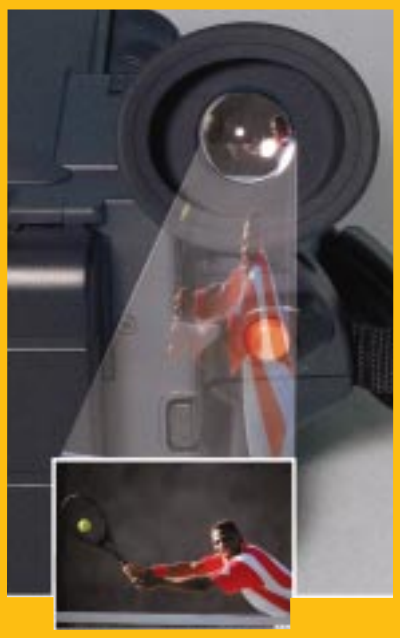
The large, high-resolution 3" ColorView™ Screen provides for TV-like viewing while recording or during playback. The display screen rotates 270° to allow for self-recording with the camcorder lens and display screen both facing you.

Simulated pictures.

Our camcorders deliver a great picture straight to your eyes and straight to your VCR.

ColorView™ Color Viewfinder

Advanced LCD technology in a compact .55" panel allows you to see the world of color your camcorder is recording — because we don't live in a black-and-white world.



VCR Compatible

Compact and full-size VHS camcorder recordings play back in your VHS VCR. It's convenient and easy-to-use — no need to worry about taking the time to run wires to play back your videos.

DOLBY DIGITAL [1] Great sound makes for a great entertainment experience. With RCA Home Theatre In A Box, you can transform your current home entertainment system into a home theatre, featuring Dolby[1] Digital surround sound. Six speakers throw sound at you from every direction with a powerful subwoofer adding impact to those loud booms and explosions. Add your current CD player and enjoy your favorite music as though it were live. Easy to install, easy to use, **great** sound.

The RCA Home Theatre In A Box featuring Dolby[1] Digital surround sound gives you theatre-quality sound in your own home.

Downloaded from www.Manualslib.com manuals search engine

Home Theatre In A Box offers you Pro Logic and Dolby[1] Digital sound options with convenient ease-of-use feature packages.

Input IQ

The receiver will remember your preferred mode per application (VCR = Pro Logic, CD = Stereo) and make sure to implement preference automatically at next use.

EZ Use Feature Set

Quick Connect Guide, Color-Coded Transparent Wiring, Color-Coded Speaker Terminals, Speaker Hanging Capability.

Subwoofer Output

Subwoofers play a vital role in putting the BOOM in explosions with heart-stopping bass. All new HTIB packages will come with subwoofer output and subwoofer.

Tough speakers stand up to big sound.

KEVLAR[2] Speaker Systems

Introducing the second generation of KEVLAR woofers for RCA Audio Systems! KEVLAR is the most durable, strongest material known to man...so strong it is the primary material used in bulletproof vests! We have incorporated KEVLAR in the manufacture of speakers throughout the majority of our EZ5 disc line. Because KEVLAR is so strong and resilient, it delivers a clear and crisp sound in all ranges. Combining KEVLAR with the power and features designed for the line, we will introduce the best sound and the best feature package around for 1999.

With long-lasting batteries and electronic skip protection, these portable CD players keep you on the go.

Second generation of ESP[X] provides longer battery life and greater range of motion. Retains up to 45 seconds of CD music in memory providing instant correction and shock-resistant uninterrupted playback.

With a wide variety of products to choose from, the RCA line of audio products can deliver great sound to so many places.

Home Theatre In A Box

The new Home Theatre In A Box (HTIB) line offers true theatre sound without the headache of a complicated set-up. Features range from Pro Logic to Dolby[1] Digital sound decoding, 200- to 500-watt receivers, and 50- to 100-watt powered subwoofers. Ease-of-use was critical in the design of the entire new line for 1999. Quick connect guides are included in each of the new models to give succinct, easy instructions. Color-coded speaker terminals make sure that hook-up is a snap. Surround sound wiring is transparent to make the mounting of surrounds as unobtrusive as possible. Finally, Input IQ. This feature will insure your receiver is always in the best possible mode for the chosen application. If you are watching a DVD and select Dolby Digital, the next time you activate your DVD player the receiver will remember your preference for Dolby Digital and select that mode for your audio. Power and finesse... RCA Home Theatre for 1999!

Audio Systems

RCA Audio Systems combine great features and convenience for 1999. With Ultra Mini, 3-disc and a new EZ5 compact 5-disc to choose from, finding the perfect product for you is a breeze. And talk about sound. These audio systems deliver rich, clear digital sound with up to 170 watts of power. Features abound, big power, all in compact designs to fit anywhere.

CD Products

Great for the gym or select a model with a car kit and listen to your favorite tunes on the go. ESP[X] models will provide all the skip protection you need without draining batteries.

Clock Radio

1999 ushers in a brand-new brand in clock radios. RCA introduces 3 new models, each with dynamic styling and distinct features. Choose from a 1.4" display model, a digital time piece with 10 presets and a NAP function, or a stereo CD model. All will come with a Graduwake™ Ramp-Up Alarm. This alarm is different. At the designated time, the alarm clock will purr at you...as you ignore it, it will escalate in intensity until you hit snooze or turn it off. RCA clock radios for 1999... innovation meets versatility.

Any great purchase is made better with the right accessories.

RCA accessories can bring a new level of performance and convenience to your home entertainment electronics with products ranging from innovative wireless headphones to attractive Bush[1] stands and entertainment centers. We feature a full-line of universal remotes that will let you control your whole home entertainment center with just a single remote. You can protect your important purchases with surge suppressors which feature phone/fax/modem protection and space to accommodate large AC adapters. The RCA brand also makes choosing an antenna for your HDTV easy with our color-coded antenna boxes. Enhancing your RCA purchase is easy with our wide selection of accessories.

Enhance and protect your RCA brand purchase with our full-line of quality accessories.

Downloaded from www.Manualslib.com manuals search engine

RCA antennas give you quality reception no matter where you live.

Our years of experience in antenna design now bring our latest introduction: our low profile digital antennas. Each antenna combines a full-range of features with a slim, contemporary design. With ease of installation, a five-year limited warranty, and state-of-the-art technology all as standard, there is an RCA low-profile antenna to meet every need and budget.

Low Profile Antennas

ANT4500X

- Amplified/Tunable Outdoor Low-Profile Antenna
- Slim, Unobtrusive Design
- Mounts Under Roof-Top or Under Eaves
- Easy Installation, Hardware Kit Included
- Paintable
- Weatherproof, UV Stable Under ABS Construction

ANT500

- Amplified/Tunable Indoor Low-Profile Antenna
- Slim, Unobtrusive Design
- Eliminates Dipoles
- Hangs Out-Of-Sight
- Easy Hook-Up, 6 Ft. Cable with F Connector

ANT350

- Passive Indoor Low-Profile Antenna
- Eliminates Dipoles
- Hangs Out-Of-Sight
- Easy Hook-Up, 6 Ft. Cable with F Connector

(Not Available in Canada)

Also Available:

ANT4100X

- Passive Low-Profile Antenna
- Slim, Unobtrusive Design
- Mounts Under Roof-Top or Under Eaves
- Easy Installation, Hardware Kit Included

(Not Available in Canada)

Universal Antennas

The Indoor Antennas offer high-power amplification to pull in weak signals and advanced features that make them the perfect choice for use with Satellite Systems to receive local programming.

ANT200

- Universal Amplified Indoor VHF, UHF & FM Antenna
- Boost VHF, UHF & FM Signals
- Contemporary Black Base
- Variable Gain Switch (Up To 32dB Gain)
- A/B Switch
- 39" Dipoles
- UHF Loop
- 72" Length, Gold-Plated 75 Ohm Hook-Up Cable
- 75/300 Ohm Matching Transformer

ANT135

- Boost VHF, UHF & FM Signals
- Contemporary Charcoal Black Base
- 12 Position Switch (6 VHF, 6 UHF)

ANT130

- Boost VHF, UHF & FM Signals
- Contemporary Charcoal Black Base
- 12 Position Switch (6 VHF, 6 UHF)

ANT120

- Boost VHF, UHF & FM Signals
- 36" Dipoles
- UHF Loop

ANT115

- Boost VHF, UHF & FM Signals
- Compact Contemporary Base
- 36" Dipoles

ANT110

- Boost VHF, UHF & FM Signals
- Heavy, Detachable Base
- 36" Dipoles

Remote Controlled Rotating Directional Outdoor/Indoor Amplified Dish Antenna

The ANT2500X is our premium Indoor/ Outdoor antenna. Remote controlled rotation, powerful 20dB VHF & UHF amplification and the option to mount indoors or outdoors makes this antenna an excellent choice for use with Direct Broadcast Satellite Systems to receive local programming.

ANT2500X

- 20dB Signal Gain on VHF & UHF
- Boost VHF, UHF & FM Signals
- Powder Coat Mast
- IR Remote Control
- IR Receiver
- Universal DBS Wall/Roof Mounting Plate
- Mounting Bracket and Mast
- 100 Ft. Combo RG59/12VDC Cable
- 12VDC Wall Adapter
- Mount Indoors or Outdoors
- 1-Year Limited Warranty

Omni-Directional Outdoor/Indoor Amplified Dish Antenna

The ANT2020X combines powerful 20dB signal gain for VHF and UHF amplification and the ease of omni-directional reception. Can be mounted indoors or outdoors and is great to use with Direct Broadcast Satellite Systems to receive local programming.

ANT2020X

- 20dB Signal Gain on VHF & UHF
- Boost VHF, UHF & FM Signals
- Powder Coat Mast
- Universal Wall/Roof Mounting Plate
- Mounting Bracket and Mast
- 60 Ft. Combo RG59/12VDC Cable
- 12VDC Wall Adapter
- Mount Indoors or Outdoors
- 1-Year Limited Warranty

(Canadian model numbers may differ)

Introduction (pages 2-3)

1 Divx is a trademark of Digital Video Express Ltd. Requires Divx compatible player to play Divx software discs. Requires registration to player via telephone line.
2 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation. Requires optional speakers and Dolby Digital receiver.
3 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation.
4 GUIDE Plus+ is a trademark of Gemstar Development Corporation.
5 COMMERCIAL ADVANCE and MOVIE ADVANCE are registered trademarks of SRT, Inc.

Digital (pages 4-13)

1 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation. Requires optional speakers and Dolby Digital receiver.
2 50 watts = 10 watts per channel (five independent power channels). RMS rating into 8 ohms 50Hz-20,000Hz, ± 3db with less than 1% THD.
3 dbx is a registered trademark of Carillon Electronics Corporation.
4 SRS, the SRS symbol ⓢ, and Sound Retrieval System are registered trademarks of SRS Labs, Inc.
5 Check your cable company's compatibility requirements.

Television (pages 14-29)

1 GUIDE Plus+ GOLD and GUIDE Plus+ are trademarks of Gemstar Development Corporation.
2 SRS, the SRS symbol ⓢ, and Sound Retrieval System are registered trademarks of SRS Labs, Inc.
3 Super Shield is a registered trademark of Super Shield, Inc.
4 Lines per picture width, 675 based on EIA measurement criteria.
5 Check your cable company's compatibility requirements.
6 dbx is a registered trademark of Carillon Electronics Corporation.
7 10 watts = 5 watts per channel, RMS rating into 8 ohms 50Hz-20,000Hz, ± 3dB with less than 1% THD.
8 Additional speakers required.
9 Lines per picture width, 592 based on EIA measurement criteria.
10 Lines per picture width, 573 based on EIA measurement criteria.
11 VCR or second video source required.
12 Lines per picture width, 510 based on EIA measurement criteria.
13 This television receiver provides display of television closed captioning in accordance with §15.119 of the FCC rules. This television receiver does not support color attributes of television closed captioning.
14 Lines per picture width, 495 based on EIA measurement criteria.
15 Bush is a registered trademark of Bush Industries, Inc.
16 Lines per picture width, 530 based on EIA measurement criteria.

TV/VCR (pages 30-33)

1 This television receiver provides display of television closed captioning in accordance with §15.119 of the FCC rules. This television receiver does not support color attributes of television closed captioning.
2 Subject to availability based on local off-air and cable broadcasts.
3 Check your cable company's compatibility requirements.

Satellite Systems (pages 34-37)

1 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation. Requires optional speakers and Dolby Digital receiver.
2 HBO, HBO Family and Cinemax are registered service marks of Time Warner Entertainment Company, LP. Showtime, Showtime Extreme, The Movie Channel and FLIX are service marks of Showtime Networks Inc., a Viacom Company. Sundance Channel is a trademark of Sundance Television, Ltd. Sundance Channel L.L.C. authorized user. fxM: Movies from Fox and all associated logos and marks are the property of fxM Networks, Inc. All rights reserved. All other trademarks and logos are the property of their respective owners.
3 Blackout restrictions apply. To receive sports and a la carte programming and to order pay per view by remote, a DIRECTV® subscription is required (except NFL SUNDAY TICKET™) and the Satellite System digital satellite receiver must be continuously connected to a land-based phone line. Sports subscriptions automatically continue each year at a special renewal rate, provided DIRECTV® carries these services, unless subscriber calls to cancel prior to the start of the season. Commercial locations require an appropriate license agreement. Commercial signal theft is subject to civil and criminal penalties. Pay per view programming is for private viewing only. Programming, pricing, terms and conditions subject to change. Hardware and programming sold separately. Equipment specifications may vary in Alaska. NFL, the NFL Shield, and NFL SUNDAY TICKET are registered trademarks of the National Football League and its affiliates. NHL, the NHL Shield and CENTER ICE are registered trademarks of the National Hockey League. "MLB," "MLB EXTF "Major League Baseball" and the Major League Baseball silhouetted batter logo are service marks of Major League Baseball Properties, Inc. Major League Baseball trademarks and copyrights are used with permission of Major League Baseball Properties, Inc. Games telecast locally on broadcast stations or regional sports networks will not be included in ESPN FULL COURT, ESPN GamePlan and MLS/ESPN SHOOTOUT. ESPN FULL COURT, ESPN GamePlan and MLS/ESPN SHOOTOUT are trademarks of ESPN Enterprises, Inc. ESPN Enterprises is a wholly owned subsidiary of ESPN, Inc. All other trademarks and service marks are the property of their respective owners.
4 When used in conjunction with our Home Control HCDSS10 accessory kit.
5 Controls the RCA Satellite System plus most brands of remote controllable TVs. Feature compatibility varies by brand and model.
6 Quality of picture and sound are dependent upon the audio system, cables, and/or television used by the consumer. Television also requires S-video input to realize full capability of the RCA DVD Player or Satellite System receiver.

DVD (pages 38-40)

1 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation. Requires optional speakers and Dolby Digital receiver.
2 Divx is a trademark of Digital Video Express Ltd. Requires Divx compatible player to play Divx software discs. Requires registration to player via telephone line.
3 Quality of picture and sound are dependent upon the audio system, cables, and/or television used by the consumer. Television also requires S-video input to realize full capability of the RCA DVD Player or Satellite System receiver.
4 DTS is a trademark of Digital Theater Systems, Inc.
5 On properly encoded widescreen discs.
6 On properly encoded widescreen discs. Requires 16:9 television.
7 Dolby Ready audio receiver and DTS receiver are required to obtain the full benefit of Dolby Digital and DTS Surround Sound.
8 When discs are encoded with special rating codes by movie studios.
9 Controls most brands of TV, VCR, and audio components.
10 Controls most brands of TV.
11 With compatible disc.

Digital Cable Modem (page 41)

1 Compared with a 28.8 Kbps telephone modem.

VCRs (pages 42-45)

1 COMMERCIAL ADVANCE and MOVIE ADVANCE are registered trademarks of SRT, Inc.
2 VCR Plus+ and Plus Code are trademarks of Gemstar Development Corp.
3 Based on current television broadcast methods.
4 Some antenna and most cable systems require one-time channel guide setup. RCA VCR Plus+ feature compatibility varies with cable systems and may not function when a cable decoder box is used. See dealer or Owner's Manual for complete details.
5 TV Guide is a registered trademark of TV Guide Financial, Inc.
6 Subject to availability based on local off-air and cable broadcasts.
7 System tunes unscrambled channels only. Check your cable company's compatibility requirements.

Audio (pages 50-65)

1 Dolby and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation.
2 KEVLAR is a registered trademark of E.I. DuPont de Nemours and Company.
3 50 watts per channel driven into 6 ohms, at frequencies from 40 Hz to 20 Hz with no more than 0.9% Total Harmonic Distortion (THD).
4 50 watts per channel, both channels driven into 6 ohms, at frequencies from 40 Hz to 20 kHz with no more than 0.9% Total Harmonic Distortion (THD).
5 50 watts per channel, both channels driven into 6 ohms, at frequencies from 40 Hz to 20 kHz with no more than 0.9% Total Harmonic Distortion (THD).
6 50 watts per channel, both channels driven into 8 ohms, at frequencies from 40 Hz to 20 kHz with no more than 0.9% Total Harmonic Distortion (THD).
7 25 watts per channel, both channels driven into 8 ohms, at frequencies from 40 Hz to 20 kHz with no more than 0.9% Total Harmonic Distortion (THD).

Accessories (pages 66-71)

1 Bush is a registered trademark of Bush Industries, Inc.
2 Super Shield is a registered trademark of Super Shield, Inc.
3 Divx is a trademark of Digital Video Express Ltd. Requires Divx compatible player to play Divx software discs. Requires registration to player via telephone line.
